PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student with strong foundations in Java, Android development, backend technologies, and Object-Oriented Programming (OOP). Experienced in building real-time mobile and web applications using Firebase, MySQL, Java Servlets, and REST APIs, with a strong interest in cross-platform application development and modern technologies.

EDUCATION

B.Tech (CSE)	S. D. Bansal College of Technology, Indore CGPA: 7.56	2023–2027
Higher Secondary	I K Boys Higher Secondary School, Indore Percentage: 71.6%	2023
Secondary	J.K Memorial Convent High School, Indore Percentage: 82%	2021

TECHNICAL SKILLS

- **Languages:** Java, JavaScript (Basics), SQL, C++, C.
- **Mobile & Cross-Platform Development:** Android Studio, Firebase, XML, Flutter (Basics).
- **Databases:** MySQL, Firebase Firestore.
- **Web & Backend Technologies:** HTML5, CSS3, Java Servlets, JSP.
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS.
- **Version Control & Tools:** Git, GitHub, Figma (UI/UX Design & Prototyping).
- **Soft Skills:** Problem Solving, Teamwork, Communication, Adaptability.

PROJECTS

College Management System | Java Servlets, JSP, MySQL (Mar 2026)

- Engineered a full-stack platform automating attendance tracking and result processing, reducing manual administrative data entry by 40%.
- Developed robust CRUD modules for student and faculty records using JDBC for optimized database connectivity and real-time data retrieval.
- Architected a dynamic, responsive web interface emphasizing UI/UX principles to streamline workflows and improve navigation.

Real-Time Android Chat Application | Android Studio, Java, Firebase, XML (Sep 2025)

- Programmed a real-time Android chat application integrating Firebase Authentication for secure user registration and login.
- Implemented Firebase Firestore to enable real-time messaging, ensuring instant transmission and cross-user data synchronization.
- Designed intuitive, responsive user interfaces utilizing XML for dynamic chat rooms, active user directories, and message bubbles.

Bank Management System with ATM Simulation | Java, Swing, MySQL (Mar 2025)

- Developed a comprehensive desktop banking application integrating Java Swing for the GUI and MySQL for secure backend data storage.
- Built core banking features including account creation, automated deposit/withdrawal processing, and a functional ATM simulation.
- Applied advanced OOP concepts and JDBC connectivity to ensure reliable database transactions and data integrity.

CERTIFICATIONS & ACHIEVEMENTS

- **Certification:** Programming in Java (NPTEL).
- **Certification:** Database Management System (NPTEL).
- **Certification:** Introduction to HTML, CSS & JavaScript (Sololearn).
- **Member:** Software Incubation Centre (SIC), SDBCT (Since July 2025).
